

The **Healthy Communities Honourable Mention** is presented to

C O R E S initiative
(Community Response to Eliminating Suicide)
Kentish Regional Clinic Inc.

This cutting edge community project aims are to work with communities from the ground up, empowering members to have the skills to intervene and the confidence to support people at risk, and the knowledge to help the person at risk to seek help.

The program was developed by members of community in direct response to concerns about the overwhelming rates of suicide taking place within the surrounding community of Kentish.

The program continues today because of the dedication of people who care.
